

Project planning form

This sheet will help you to design and develop your project.

Brief description of your project

How will this project help create a sustainable community? What will success look like? Think across the three pillars of sustainability - socially, environmentally and economically.

What steps must you undertake? Identify and write down 5 key steps.

Are there any additional things you need to consider or undertake?

What funding could you look at and from where?

Who can you contact for more help and advice?

What additional sustainability actions have been added to embed sustainable development into the project?

(Use the 'Creating community projects that do not cost the Earth' checklist in the Resources section to help you.)
